
PLANTING TREES As Carbon Offset

1 tonne
CO₂ Emissions

3.5
Native Trees

Carbon
Neutral

Whatever your industry, your company produces CO₂ as part of simply doing business – through travel, powering your office or by producing a product. We all contribute to climate change. But we each have the ability to tackle this issue.

Native trees remove from the atmosphere approximately 2.5 tC/ha/yr (on average), accumulating a maximum stock of around 500 tC/hectare for some forest types.

Te Kāhano has set up a localised carbon offset initiative based on the Landcare CarbonZero programme (a recognised certifier for greenhouse gas footprint measurement, emissions reduction and carbon neutral claims). Te Kāhano's **simple and local offset initiative provides an affordable way for anyone** to offset carbon dioxide emissions and is based CarbonZero's \$28.75 per tonne CO₂-e

VEHICLE EMISSIONS

Vehicle Size	10,000km Driven p.a.	20,000km Driven p.a.	30,000km Driven p.a.	50,000km Driven p.a.
Small/Hybrid Petrol	\$52 + GST	\$104 + GST	\$155 + GST	\$259 + GST
Small/Hybrid Diesel	\$49 + GST	\$98 + GST	\$147 + GST	\$244 + GST
Medium Petrol (1.5-2L)	\$68 + GST	\$137 + GST	\$205 + GST	\$342 + GST
Medium Diesel	\$61 + GST	\$121 + GST	\$182 + GST	\$304 + GST
Large Petrol (>2L)	\$90 + GST	\$179 + GST	\$269 + GST	\$448 + GST
Large Diesel (>2L)	\$106 + GST	\$213 + GST	\$319 + GST	\$532 + GST

NOTE: Tree quantities have a 10% mortality rate as a safety net for successful plantings. Plantings can be one-off or taken at an annual level at a chosen habitat restoration site. All plants are eco-sourced and propagated at our own community-based nursery in Wanaka.
